Version 1.0 april 2026

How to setup Biometric Passkey

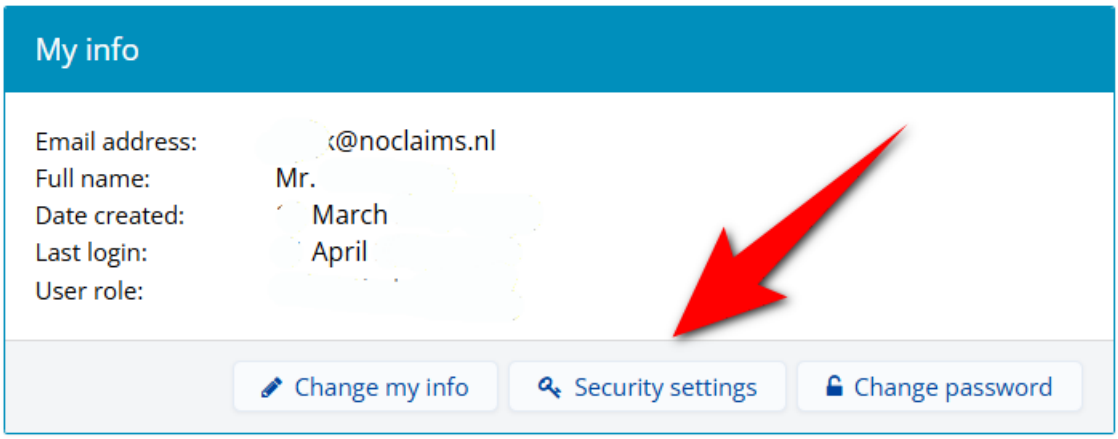

Log in with your highest user role.
Or increase your role after logging in via the user account.

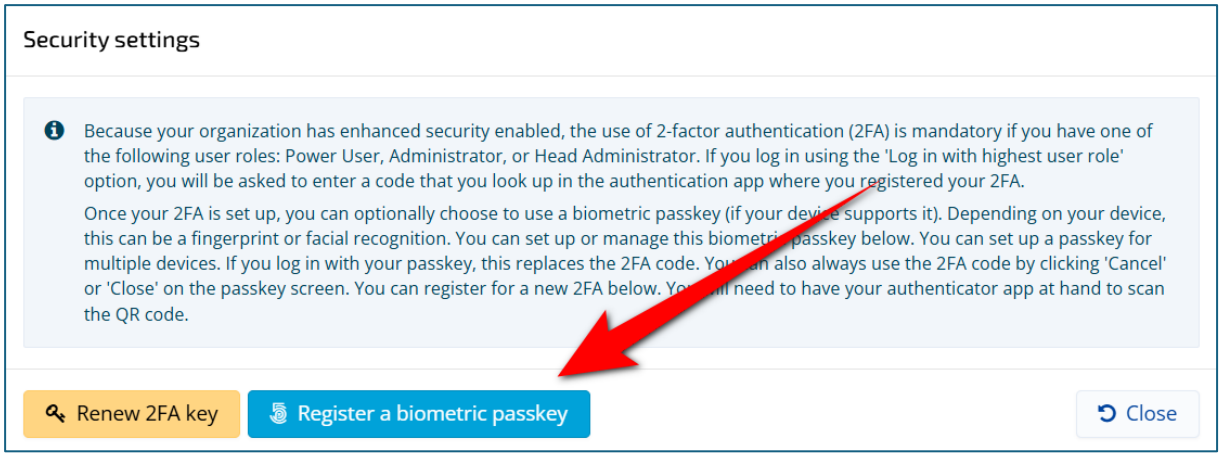

Click on your name and role, then choose **My settings**.
See picture below Step 1 and Step 2

Choose **Security settings** in My Info

Choose **Register a biometric passkey**

Follow the steps in registering your passkey and give a name you recognize. For example Macbook or Windows PC.

From now on when logging in and increase your user role your computer will ask and validate your logging in with the Biometric credentials on your computer.

You can register several computers. And in the menu register a biometric passkey you can see which passkey's are set and remove if you change or remove existing passkey(s).
